

PPTP VPN for Android

Step 1: Go to the Wireless And Network settings

In the next screen, tap the VPN Settings button

Flight mode

Disable all wireless connections

Wi-Fi settings

Set up and manage WAPs

Bluetooth settings

Manage connections, set device name, and visibility

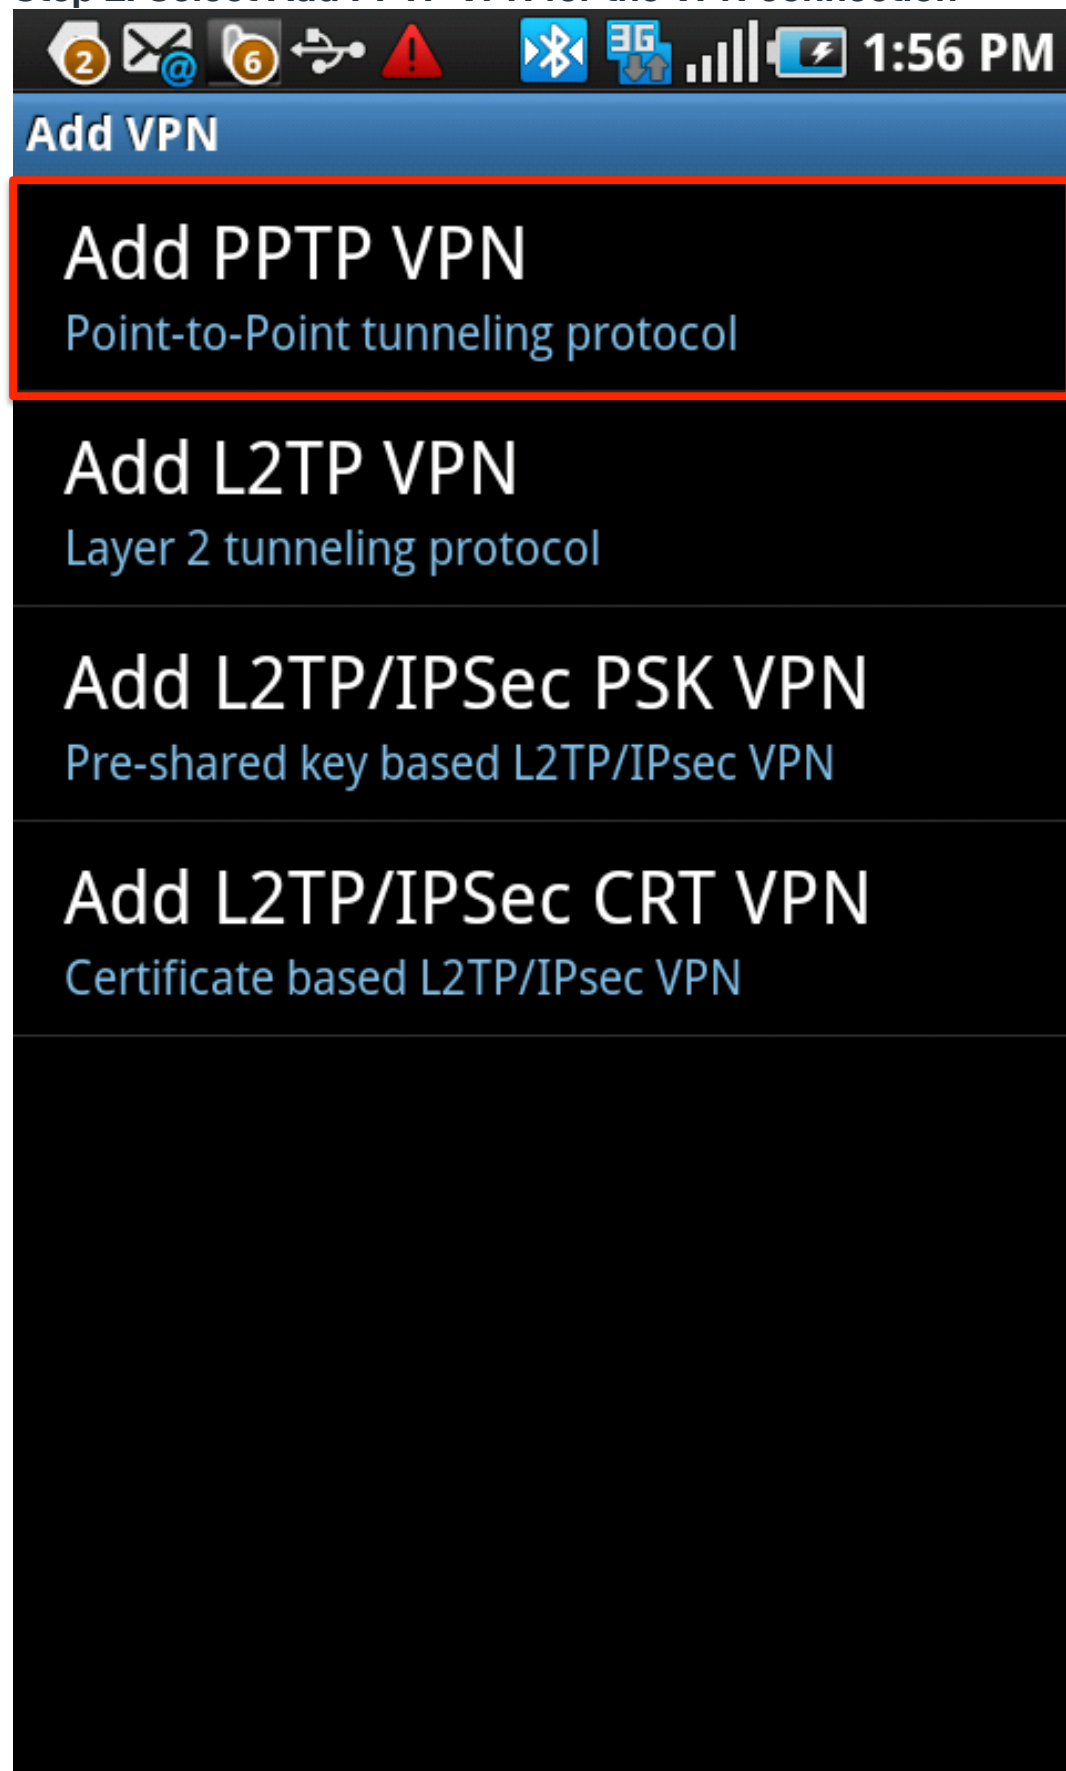

VPN settings

Set up and manage Virtual Private Networks (VPNs)

Mobile networks

Set options for roaming, networks, APNs

Step 2: Select Add PPTP VPN for the VPN connection

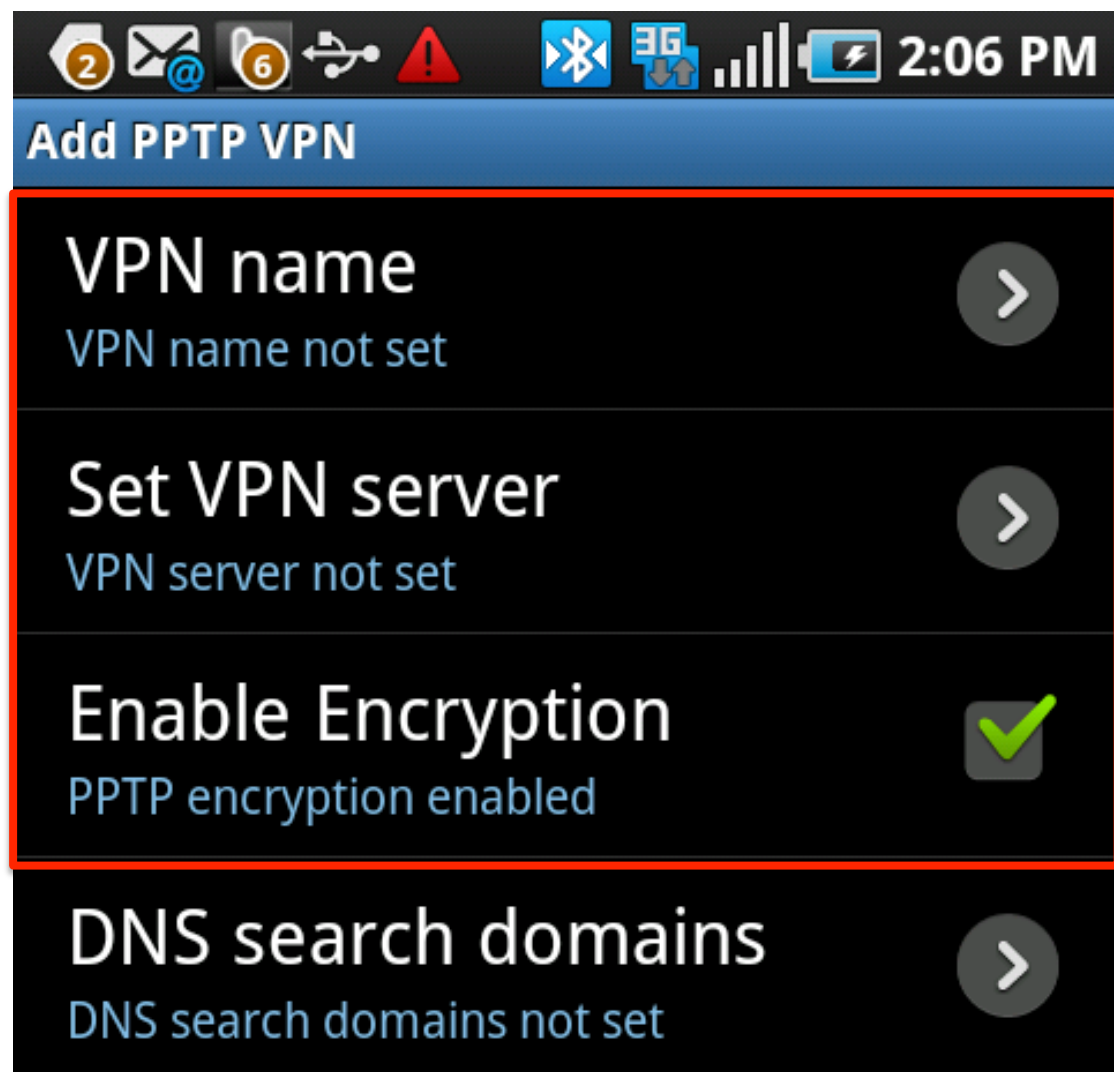

Step 3: Configure the VPN connection

VPN Name: **Leap4Net**

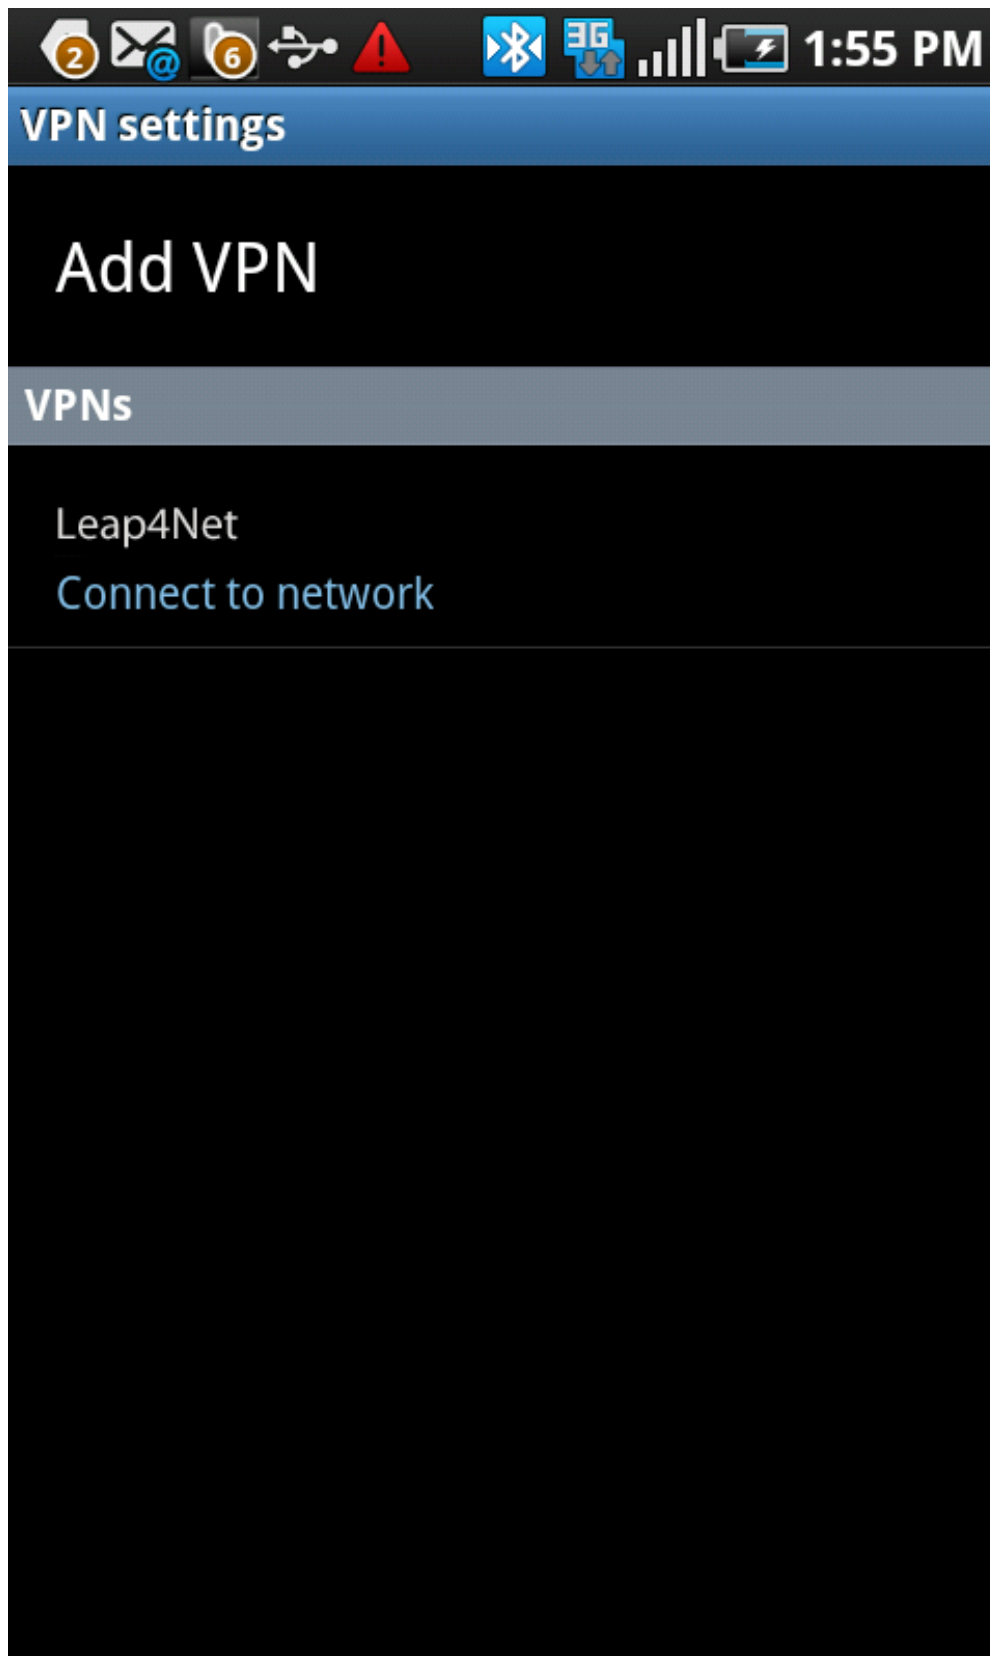

Enable Encryption: Set by default.

When you tap **Set VPN Server**, a new window will appear. Fill in the Host with **vpn.leap4.net** and enter the **Username** and **Password** you got from the greeting mail for that configuration and click OK. (All of the configuration options windows will be similar in look and feel)

Step 4: Connect to your VPN

Tap the Leap4Net VPN you just added the connection

Once you make a successful connection, you'll see a key icon in your notification area indicating you are connected to a VPN.
